

**Product Description:**

Bob Beck called it a blood electrification device. Here in the US it is illegal for anyone marketing such a device to label it by that name. For lack of a better term, we call it either a blood purifier or blood zapper. I called my unit the "Mighty Zap©". As claimed by the Bob Beck Protocol this device kills all virus, bacteria, fungus (candida) and parasites floating around in your blood! It's mainly candida in our bodies that makes people crave sugar! After I used the blood purifier for one month, all of my sugar cravings went away and they didn't come back!

**NOTE: LED does not light when plug is inserted into jack. This is to save battery power. Replace Battery when LED becomes weak.**

The difference between the device I made 12 years ago and the one I'm selling now, is that I'm using the latest electronic circuit technology on a custom designed PCB. This allows the device to be 1/3 the size of the original and to run on one 9V battery instead of three. It's also much lighter and so small that it can be easily strapped to ones arm and used while working, or doing other things at home.

The original 3 battery device was invented by two medical doctors over 20 years ago. When they went for peer review, the two physicians were ostracized by the medical community and lost all credibility. A PhD electrical engineer by the name of Bob Beck took up the technology and continued to disseminate the information to the general public until he passed away from old age in the early 2000's. His lecture circuit was called "Take Back Your Power" and was completely free. Beck openly shared what he called the Bob Beck Protocol which was so effective, that this health regime was helping HIV Positive people to become HIV negative! The Protocol involves 4 steps that includes the use of the blood purifier, a magnetic pulse device, the drinking of colloidal silver water, and the drinking ozonated (O3) water. If you're interested in a blood purifier, which I believe to be the most important part of the Bob Beck Protocol, or have any questions about it, please feel free [contact me](#) through this website. I'll be happy to answer any questions I can.

To find out more information about the Bob Beck Protocol, the complete original "Take Back Your Power" Lecture can be seen by clicking on the first link below. The accompanying handout that Beck passed out for people to follow along at his lectures, can be download by clicking on the second link. [Bob Beck "Take Back Your Power" Lecture Video](#) — [Take Back Your Power Handout - 1MB PDF](#) If you are not familiar with the Beck Protocol and are interested in purchasing this device, then I highly recommend watching the video and downloading and printing the pdf document before doing so.

### **What's Included**

The Mighty Zapp©, the connection cable and two sets of self adhesive tens pads.

### **Recommended Accessories Not Included With This Device**

Below are photos of some recommended accessories that will make using this device easy and practical. The Avia arm and wrist bands came as a package of two and were purchased at Walmart. The iNeiba elastic cell phone holder I purchased from Amazon.com. I do provide two sets of self adhesive Innopatch tens pads with the device, however replacements are readily and cheaply available off of eBay and other online sources. One set of self adhesive tens pads should last at least a week. Be sure to moisten the adhesive surface of the tens pads and the application area of your wrist before applying. If one has body hair in the area of application, it is recommended that it get shaved off before applying self adhesive tens electrode pads.

Since this device operates on a single 9V battery, I recommend purchasing a set of 4 EBL 9V lithium ion batteries which come with their own specialized charger. These are the best and most reliable rechargeable batteries available. If used every day, the battery should last 1-2 weeks.

### Hooking It All Up
